Professional Summary

- Software Engineer with **2.5+ years of experience** specializing in **Angular and TypeScript development**, building scalable and responsive enterprise **web applications**. Strong experience with Angular, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, NgRx, RxJS, REST API integration, reusable component architecture, UX, and application **performance optimization**. Experienced in **Agile development, debugging production issues, code reviews**, and collaborating with product, design, and backend teams to deliver maintainable, high-quality software solutions.

Education

- **Maharana Pratap Engineering College** 2020 - 2024
  Bachelor of Technology (Computer Science & Engineering)

Experience

- **Centocode Technologies Private Limited** Sep 2024 - Current
  Software Developer I
  - Designed, developed, tested, and maintained **production web applications** using JavaScript, TypeScript, Angular, Next.js, and REST APIs.
  - Integrated **frontend applications** with **backend services** and external APIs to implement **data-driven** product functionality.
  - Worked on **AI-powered applications** and **API integrations** involving automated evaluation, data processing, and intelligent workflows.
  - Participated in **code reviews**, **debugging production issues**, and maintaining clean, well-documented code following best development practices.

- **Nashtech Global** Nov 2023 - Jul 2024
  Frontend Developer
  - Developed and maintained **scalable enterprise web applications** using **Angular, TypeScript, and Angular Material**, focusing on scalable frontend architecture and reusable UI components.
  - Built modular and maintainable frontend solutions by implementing **component-based architecture** and **reusable UI libraries**.
  - Integrated **REST APIs** to enable seamless communication between frontend and backend services.
  - Improved **application performance** and user experience by optimizing UI rendering and implementing efficient **state management** practices.
  - Collaborated with backend developers, designers, and product teams in an **Agile development environment** to deliver high-quality features and resolve production issues.

Technical Skills

- **Frontend Development**
  Angular, React, JavaScript, TypeScript, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, AG Grid, , Material UI, Responsive Design

- **State Management**
  NgRx, Redux, RxJS, Session Management, State Management

- **Testing & Debugging**
  Jasmine, Karma, Unit Testing, Application Debugging, Troubleshooting, Software Testing, Performance Optimization

- **Backend & API Development**
  Node.js, Express.js, Golang, REST APIs, Microservices

- **Database**
  MySQL, MongoDB, SQL, PL/SQL

- **Developer Tools**
  Git, GitHub, VS Code, Chrome DevTools, Google Analytics, Azure Board, Jira, Postman, Version Control

- **AI & Developer Productivity**
  OpenAI APIs, Natural Language Processing, Intelligent Search, Automated Evaluation, AI Workflows, Cursor, GitHub Copilot, ChatGPT, Claude, DeepSeek

- **Engineering Practices**
  Component Architecture, UX/UI Development, SDLC, Application Debugging, Performance Optimization, Cross Browser Compatibility, Agile Development

Projects

- **Introview – AI Interview Platform**
  Tech Stack: Angular, GoLang, OpenAI API, SQL, Speech-to-Text
  - Built an **AI-powered interview platform** that simulates real interview environments with automated question generation and answer evaluation.
  - Implemented **video recording and speech-to-text** processing to capture candidate responses during interviews.
  - Developed **AI evaluation workflows** using **OpenAI APIs** to generate candidate feedback and performance analysis reports.
  - Implemented **gaze detection and cheating detection** mechanisms to monitor candidate engagement during interviews.

- **Waptoz – WhatsApp CRM Platform**
  Tech Stack: Next.js, GoLang, MongoDB, PL/SQL, Meta WhatsApp Business API
  - Developed features for an all-in-one **WhatsApp CRM platform used by 2000+ clients** for automated messaging, marketing campaigns, and lead management.
  - Integrated **Meta WhatsApp Business APIs** to enable bulk messaging, template management, and automated customer communication.
  - Developed **reusable UI components** for campaign management and analytics.
  - Improved user **workflows** for marketing and customer communication.

- **VisionWay CRM – Immigration Management Platform**
  Tech Stack: Angular, Nest.js, Bootstrap, Rest Api's, SQL
  - Designed and developed a **custom CRM platform for VisionWay Immigration** to manage visa consultancy workflows and client communication.
  - Implemented modules including **lead management, visa tracking, document management, and follow-up systems**.
  - Collaborated with **business stakeholders** to understand requirements and deliver **customized CRM solutions**.
  - Improved operational efficiency by centralizing consultant workflows for **250+ daily active users**.

- **GO 1% – HRMS Platform**
  Tech Stack: Angular, Scala, REST APIs
  - Designed reusable Angular components to improve maintainability and scalability of the **HRMS application**.
  - Enhanced data visualization by converting complex tabular datasets into **interactive UI components**.
  - Implemented **responsive UI** and **optimized** frontend performance for improved user experience.

- **DJJS – Event Management Website**
  Tech Stack: Angular, Nest.js, Material UI
  - Contributed to development of the **Divya Jyoti Jagrati Sansthan** event management platform.
  - Implemented dynamic UI components and backend integrations to manage event information and updates.
  - Ensured responsive design and optimized UI performance across devices.
